Poly Rapid Prime™

Experience the freedom of customization with our in-house

pigmentation machine method. Transform your flooring into

an artistic canvas, ready to be adorned with an explosion of

colors or industrial hues. Let your imagination run wild as you

experiment with unique color combinations, bringing your

Welcome to a new era of creativity, where speed, adhesion,

redefine the possibilities of your flooring. Elevate your space

Discover the power of **Poly Rapid Prime™** and embrace a

world of limitless customization for your concrete surfaces. It's

time to revolutionize your projects, create a space that stands

out, and make a lasting impact with a floor that combines

exceptional performance with stunning aesthetics.

Rapid Primer

and unleash the full potential of your floors with Poly Rapid

Prime[™]—a primer that not only delivers flawless performance

ease of use, compatibility, and vibrant colors converge to

space to life and leaving a lasting impression.

but also offers limitless color options.

Revolutionizing Concrete Surfaces with Speed, Performance, and Limitless Color Possibilities

unprecedented speed and performance. This solvent-free primer, crafted with Advanced Cure

Technology, swiftly reacts with atmospheric moisture to achieve rapid curing, allowing your project to progress quickly and efficiently. In fact, it achieves re-coat

readiness in an astonishing 20-40 minutes under most condi-

But that's not all. **Poly Rapid Prime™** offers exceptional adhesion, forming a strong and long-lasting bond

with both dry and slightly damp substrates. It serves as the ultimate solution for priming and sealing porosity in concrete, masonry, and a wide range of non-metallic substrates, providing a solid foundation for your coating system.

Say goodbye to stress and time pressures. With a generous pot life after mixing, **Poly Rapid Prime**[™] gives you ample time for a smooth and precise

application. It effortlessly adapts to various surfaces, whether it's ground or blasted concrete or older surfaces stripped of oil and contaminants. Its versatility

expands your creative possibilities, making it an ideal choice for diverse applications.

And let's not forget the array of vibrant colors available. Poly Rapid Prime™ offers over 130 colors through our Infinity Effects Pigmentation machine. Unleash your creativity and elevate your space with a floor that exceeds ordinary expectations. Whether you're aiming for decorative masterpieces or durable industrial surfaces, Poly Rapid Prime™ allows you to create a customized floor that perfectly reflects your personal style and vision.

Poly Rapid Prime™: **ADVANTAGES**

Rapid curing: Achieves re-coat readiness in 20-40 minutes under most conditions.

Exceptional adhesion: Forms a strong and long-lasting bond with dry and slightly damp substrates

Priming and Sealing: Ideal for priming and sealing porosity in concrete, masonry, and non-metallic substrates.

Easy application: Provides a generous pot life after mixing, allowing for a smooth and precise application.

Versatile compatibility: Adapts effortlessly to various surfaces, expanding creative possibilities.

Customization: Transform your flooring into an artistic

Limitless color options: Over 130 vibrant colors available through our Infinity Effects Pigmentation machine.

canvas, creating unique color combinations.

Revolutionize projects: Redefine the possibilities of your flooring with speed, adhesion, and vibrant colors.

Flawless performance: Delivers exceptional performance, combining durability and stunning aesthetics.

SURFACE PREPARATION:

Prior to applying Poly Rapid Prime™:, ensure that the substrate is thoroughly dry and cured. Although trace amounts of surface moisture may be tolerated, it is preferable to have a dry surface. Remove any loose materials, laitance, oil, grease, or other contaminants to achieve a clean surface. Diamond grinding or blasting is recommended for concrete substrates, but if not feasible, thorough cleaning is essential.

MIXING: Combine the entire hardener component with the resin in the designated tin. Mix the components slowly for 3-5 minutes, ideally using a flat mixing blade in a drill. Be cautious not to introduce excessive air into the mixture, as it can reduce the pot life. Alternatively, if a smaller quantity is needed or if the pot life may be exceeded, measure the resin and hardener in the specified proportions using digital scales.

SOLVENT: When applying Poly Rapid Prime™: through a spray application method, it is permissible to add up to 10% of recommended solvent. Please contact Infinity Effects representative for information.

APPLICATION: Poly Rapid Prime™: can be effectively applied using a brush, roller, or airless spray. Apply a thin coat, ensuring that the material is worked into pinholes and imperfections to achieve complete coverage of the surface. Avoid excessive application, as it may lead to foaming and the formation of thick areas. Some porous substrates may require a second coat to ensure full sealing of all porosity.

POLY RAPID PRIME- Specification	
Туре	Two part moisture activated polyurea coating
Mix ratio	See label on tin
Hardener	243
Resin Density	1.06 kg/litre
Coverage	6 - 8 m2/litre, depending on surface texture and porosity
Minimumover-coating time	20 minutes
Maximumover-coating time	48 Hours
Solvent	Thin with recommended solvent if necessary and for spraying
Colours	Clear
Pack sizes	1, 2.5, 5 and 10 litre
Shelf Life & Storage	6-12 months in original, unopened container. Store in cool, dry conditions
